Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

1. The following document is cited from the examiners knowledge:

D3: US 5 024 680 A

2. The present application does not meet the requirements of Article 33(1) PCT, because the subject-matter of claims 1,2 and 4-11 is not new in the sense of Article 33(2) PCT for the following reasons:

Document D3 discloses in claim 1 a diamond grit comprising diamond particles coated with an inner layer of chromium carbide and an outer layer of a metal deposited on the inner layer. In example 1 the material of the outer layer is tungsten. According to claim 13 the outer tungsten layer can be deposited by physical vapour deposition.
The subject-matter of claims 1,2 and 4-11 is thus not new compared with D3.

3. The present application does not meet the requirements of Article 33(1) PCT, because the subject-matter of claim 3 does not involve an inventive step in the sense of Article 33(3) PCT for the following reasons:

3.2 Replacing the metals for the outer coating disclosed in D3 by the specific alloys of present claim 3 can only be regarded as inventive, if this selection leads to an unexpected technical effect. However, no such effect is indicated in the application. Hence, no inventive step is present in the subject-matter of claim 3 over the disclosure of D3.
